Your digital pension certificate

You can now access information about your pension flexibly at any time, thanks to our collaboration with ePlix.

ePlix is an independent Swiss web app with the highest security standards. It offers a complete overview of your personal pension provision – something that is hitherto unique. With the intuitive web app, you now not only have access to your digital pension certificate, but also benefit from many other features:

- **Clear, explanatory depiction of your pension plan** and benefits
- Simulation and calculation of **retirement benefits** upon early or delayed retirement, lump-sum withdrawals and much more
- Further **information** on your pension provider, such as the coverage ratio, members of the pension fund commission, regulations, etc.
- Overview of buy-in opportunities for your pension plan and simple processing of buy-ins
- **Access to tax certificates** (for pension plan buy-ins)

Your pension plan and certificate will solely be accessible via ePlix from 2024 onwards.
This not only reduces the amount of paper we use, it also enables you to access your current pension data at all times.

Register now in just a few steps:

1. Scan QR code or open www.eplix.ch/en/tellco
2. Have your identity document ready (e.g. passport, ID, driving licence, etc.)
3. Have your social security number ready (can be found on your health insurance card)
4. ... and get started!

A simple, clear explanation

Your pension certificate provides in-depth information about your personal occupational pension – but it contains so many numbers that it's easy to get confused. You can find a simple explanation of your pension certificate on our website at **www.tellco.ch/insurance-certificate** so you are always perfectly informed about your contributions and benefits relating to your pension fund solution.
